DISCOVER

THE LIFE SCIENCES INDUSTRY

This annual event is tailored for master's and PhD students, young professionals and academic researchers aspiring to make their mark in the life sciences. Whether you're a professional seeking insights from industry leaders, a student with a passion for science, or an academic looking to transition into this dynamic sector, the Biopôle Discovery Day provides a platform for all. Engage with like-minded individuals, glean wisdom from inspirational entrepreneurs, and connect with industry experts who are shaping the future of life sciences. Join us for the 2025 edition:

- Explore StartLab, the life sciences incubator nurturing innovative start-ups.
- Connect with seasoned entrepreneurs, gaining valuable insights and networking opportunities.
- Engage with former academics who've transitioned into impactful roles on the Biopôle campus, discovering diverse career paths.
- Explore the journeys of individuals who have benefited from the BNF programme or participated in the Biopôle Postgrad Consulting, learning how these programs have positively influenced and shaped their professional paths.

Find the updated programme details on our website: biopole.ch/events.

Seating is limited, so be sure to [secure your spot here](#), starting from January 23rd, 2025.

DISCOVER BIOPÔLE

Based in Lausanne, Biopôle is one of the largest life sciences campuses in Europe. It offers state-of-the-art facilities to over 170 companies, from start-ups to multinationals. These benefit from pioneering spaces, such as ready-to-go laboratories StartLab and Superlab, as well as a Digital Health Hub. It's also home to more than 25 world-famous academic groups, with research teams based at Lausanne University Hospital (CHUV), the University of Lausanne (UNIL) and Ludwig Cancer Research.

Biopôle's vibrant community includes over 2,500 people, who collaborate extensively. This convergence of talent and expertise facilitates the development of cutting-edge innovations in pharma, medtech, biotech and digital health, among other sectors.

Biopôle SA, which owns, manages and promotes the life sciences campus, also supports the community: it provides financial help through its Start-up Fund, business strategy support via Vanguard Accelerator and an abundance of networking opportunities.
