Dr Laurence Tanenbaum joins Agora Care

We are delighted to announce that Dr. Lawrence Tanenbaum, Vice President, Chief Technology Officer and Director of Advanced Imaging at Radnet Inc., has joined Agora Care as a strategic advisor. He will be assisting us in shaping our strategic plan for the successful introduction and deployment of Agora Care in the United States.

At Agora Care, our focus is on revolutionizing the patient experience by introducing a patient-centered platform that provides a secure space for storing and sharing medical imaging data. With Dr. Tanenbaum's extensive experience and expertise in the medical imaging industry, as well as his involvement in various advisory board chairs (OEM, pharma, and AI), we are confident in his ability to guide us in achieving our goals.

Dr. Tanenbaum's notable interests lie in the development of AI and machine learning applications, contrast agents, MR, CT, and advanced rendering. His dedication to advancing the clinical practice of medicine with a focus on patient-centric care, efficiency, radiation dose, and physiologic imaging aligns perfectly with our vision at Agora Care.

We are truly thrilled to have Dr. Tanenbaum as part of our team and eagerly anticipate expanding our platform in the United States under his guidance. Stay tuned for more exciting developments as we continue to strive towards enhancing patient care and accessibility through cutting-edge technology.
