Eva.J Swiss Organic Neurocosmetics: Pioneers in Neurocosmetic Skincare

Eva.J Swiss Organic Neurocosmetics introduces groundbreaking therapeutic wellness in skincare through patented formulations that revolutionize skin health.

Lausanne Switzerland – [Date] – Bioessant s.a.r.l and its brand Eva.J Swiss Organic Neurocosmetics are proud to announce its official leadership in neurocosmetic skincare innovation, supported by Swiss patents. The first patent delivered in November 2024 for the “Composition for the reduction of symptoms of couperose and/or rosacea” is now being integrated into highly effective skin solutions, for example our Hero Serum “Fragile Capillaries”. Our latest achievement, a second patent covering eight dermo-cosmetic products and specialized application techniques for clinics and medical Spas, positions Eva.J at the forefront of skincare technology. This milestone marks the brand's continued commitment to developing cutting-edge solutions that harness the power of olfactory and sensory stimuli to modulate skin functions. A number of Swiss aesthetic clinics and dermatologists manifest their interest in discovering Eva.J range.

With these new patents, Eva.J Swiss Organic Neurocosmetics is pioneering formulations that target both the peripheral and central nervous systems, regulating inflammatory responses and optimizing skin repair mechanisms. The brand’s innovative approach enhances skin health, reduces inflammation, and accelerates cellular regeneration, resulting in visibly healthier, more resilient, and less reactive skin.

Innovation Meets Wellness

“We’re excited to share that our neurocosmetic formulas are changing the skincare industry, offering a holistic & clinical approach to skin health,” said Eva Johnston, CEO of Bioessant who has been working on improving skin health for the last 17 years. “By tapping into the body’s sensory responses, our products offer targeted results that improve skin health, providing customers with skin that’s not only beautiful but resilient and balanced.”

Eva.J Swiss Organic Neurocosmetics is committed to making dermatological skincare accessible to everyone and deeply rooted in responsible sourcing and production. Eva.J products provide response for sensitive skin, rosacea, loss of tonus, and hyperpigmentation, and are designed to work seamlessly with a healthy sleep routine and emotional well-being.

Customer Satisfaction: A Proven Success

We are proud to share positive customer feedback from those who have experienced the benefits of our products. One of our customers, Monica, shared that after using our Eye Precious Oil and Face Cream N°3 : “I love this product so much, it has become my nightly wellness ritual, my little private SPA moment at home that I look forward to every day. As for its effectiveness, I have no doubt. I can see that I look healthier, and it’s not just me noticing it.”

Join the Future of Skincare

Eva.J Swiss Organic Neurocosmetics invites everyone to discover the future of skincare by exploring the collection of neurocosmetic products. Begin your journey to natural skin longevity with our best-selling duo, **Cream N3** and serum **Eye Precious Oil**. Apply Cream N3 in the morning for skin moisturizing and comfort, and a drop of the serum to the lower eyelid and temples at night for enhanced radiance and reduced eye bags.
